

Sports Flooring System

DYNAMIK Flexi-Beam Elite

Sprung Timber Sports Floor

DYNAMIK

The DYNAMIK Flexi-Beam Elite system is a cradle and beam sprung area elastic sports floor. It incorporates Flexi-Beams which support a 22mm premium engineered sports board. The system can be packed and levelled to take out variations in the sub floor.

The structure of the Flexi-Beam Elite system incorporates Flexi-Beams to provide a stable base for the 22mm board and allows for underfloor heating and insulation to be incorporated between the beams. Given it can be packed and levelled off a structural slab, the requirement for a levelling screed is avoided.

Flexi-Beam Elite Benefits

- Meets the requirements of EN 14904
- Sport England compliant
- Packed & levelled construction
- Underfloor heating compatible
- Complies with the latest ESFA specification
- Factory finished sports lacquer
- 25 year warranty
- Enhanced acoustic properties

Surface Finishes

The Flexi-Beam Elite engineered sports board is available in four different wood species:

European Oak

Beech

Ash

Canadian Maple

Official Partners

DYNAMIK Flexi-Beam Elite

Technical Specifications

1 Premium Engineered Sports Board	22mm
2 Flexi-Beam	43mm
3 Sports Cradle: 100mm x 100mm x 10mm	10mm
4 Levelling Shims	To Suit Void
System Thickness (excluding levelling shims)	75mm
<i>A minimum void (drop in screed) of 85mm is required to install, pack and level the system based on an SR3 structural slab (this allows for a +/- 10mm level tolerance of the slab).</i>	

Performance Characteristics

Certification - EN14904	Class A4
Shock Absorption	55% < 75%
Vertical Deformation	2.3mm < 5.0mm
Rolling Load	≥1,500 N
Ball Rebound	≥ 90%
Slip Resistance	80 - 110
